**Jessica Scobell, PRINCIPAL**

Dear Losee Families,

We wanted to communicate important dates for testing during the 19-20 academic year.

This winter and spring, your students may be participating in the below assessments. During this time, we ask for your partnership! We know that the communication and connection between home and school, leads to the success of our students. Your student will be testing over multiple days. During the week of testing, we ask that all students are getting plenty of rest, eating a good breakfast, drinking plenty of water, and bringing adequate size lunches. We also thank you in advance for assuring your student is in attendance during their testing periods.

These assessments measure your student's proficiency and growth, from year to year. At Somerset Losee, we take pride in our students' performance. We know that our students have had a great year and are prepared to show what they know! Please assist us in explaining importance of this test. Also, in encouraging your student to have a growth mindset and do their best. We know this time can be stressful for our students and we aim to provide the most positive environment for all our students.
